Professional Summary {#resumen-profesional}

I am a **Senior Software Engineer** with over 15 years of end-to-end development experience, specializing in building critical, highly scalable backend systems and integrations. My core expertise lies in the **Java ecosystem (Spring Boot)** and modern **Cloud environments (GCP, IaC)**.

I have a strong track record of integrating complex systems with external partners, particularly in highly regulated and demanding environments such as Banking/Finance (Citibank) and Global E-commerce (Caterpillar). I excel in fast-paced expansion environments, quickly adopting new technologies (such as Agentic AI, Elixir, Go), and delivering high-quality REST APIs and microservices. I am comfortable collaborating across US and LATAM timezones, driving technical architecture, and solving large-scale integration challenges.

Technical Skills {#habilidades-técnicas}

Core Backend: Java (8 - 21), Spring Boot, API Integrations, Microservices, Distributed Systems

Other Languages/Frameworks: JavaScript, Elixir (Ash Framework), Golang (Foundational), Bash

Cloud & Infrastructure: Google Cloud Platform (GCP), Pulumi (Infrastructure as Code), Docker, Linux

Databases: PostgreSQL, Oracle PL/SQL, MySQL, Relational Data Modeling

DevOps & AI: CI/CD (Jenkins, Azure DevOps, Gitlab), Git, Agentic AI Tooling (Pi.dev, LLM Integrations)

Relevant Experience {#experiencia-reciente}

CTO & Co-founder | *Mobility Tech Startup* 2024 -- Present

Technologies: Java 21 (Spring Boot), Google Cloud, Pulumi, Agentic AI, APIs\

- **Architecture & Cloud:** Built a scalable backend infrastructure from scratch using Java 21 and Spring Boot, deployed entirely on GCP using Pulumi (Infrastructure as Code).
- **System Integrations:** Designed robust APIs for internal and external consumption, connecting services securely and efficiently.
- **Fast Paced & AI Adoption:** Rapidly adopted and integrated AI agents into the development workflow to accelerate delivery and handle complex boilerplate, proving adaptability to new tooling

and dynamic startup environments.

Java Associative Developer | *Perficient - Caterpillar* 2022 -- 2023

Technologies: Java 21 (Spring Boot), Microservices, API Integrations, Agile\

- **Partner & System Integration:** Developed and maintained backend services for Caterpillar's global e-commerce platform, integrating internal components with external vendor platforms.
- **Global Collaboration:** Collaborated daily with multicultural, cross-functional teams spanning the US, India, and LATAM in a fully remote Agile environment.
- **Scalability:** Optimized API performance and ensured code quality through automated testing and peer reviews.

Java Specialist | *Citibank* 2021 -- 2022

Technologies: Java, Spring Framework, Oracle SQL, Jenkins\

- **Financial Integrations:** Developed mission-critical backend solutions for financial reporting and banking operations (Global Money Movement concepts).
- **Data & Security:** Worked extensively with Oracle databases, migrating data safely and ensuring compliance with strict banking security standards.
- **Support & Delivery:** Executed monthly release cycles, providing robust technical support and feature delivery within US timezones.

CTO & Backend Developer | *Seven IT SpA (Hospital Management)* 2017 -- 2020

Technologies: Spring Boot (REST), PostgreSQL 9.6, Google Cloud (VM)\

- **End-to-End Delivery:** Architected and delivered a complete hospital management system handling sensitive medical data, appointments, and billing.
- Led the integration of external payment and reporting systems.

Senior Java Developer | *WebClass, Creasys, Coopeuch, Others* 2008 -- 2017

Technologies: Java, Hibernate, PostgreSQL, Oracle\

- Delivered comprehensive backend solutions for banking entities (Coopeuch, Santander) and large-scale EdTech platforms.
- Led bank system migrations and created high-performance transactional services.

Education {#educación}

Computer Engineering Degree | Universidad del Bío Bío, Chile

Thesis: Extreme Programming (XP) - Theory and practice.
