

Gonzalo Oviedo Lambert *Senior Software Engineer - AI-Enhanced Full-Stack Developer* Limache, Valparaíso Region, Chile | GMT-4 - UTC-4 goviedo.laboral@gmail.com | +56 9 6372 3603 linkedin.com/in/gol | English B1 (Intermediate)

Professional Summary

Senior Software Engineer with 15+ years of experience and daily practice as an **AI-Enhanced Coder**, orchestrating software agent *harnesses* such as **Pi.dev** and **opencode** to drive full-cycle development of critical applications. I don't just delegate to AI — I apply architectural judgment, deep thinking, and technical oversight to design agentic workflows, integrating LLMs in production with prompt engineering, tool calling, and structured output control. Strong expertise in SQL (PostgreSQL, Oracle), REST APIs, and development with React, JavaScript, and TypeScript. Proven track record of owning features from stakeholder request through deployment, documenting architecture and processes for team scalability.

Technical Skills

AI Agentic Harnesses (Key Differentiator): Daily mastery of Pi.dev and opencode as software agent harnesses — designing skills, commands, agentic workflows, integrating cost-efficient LLMs, structured prompt engineering, and tool calling. AI-Enhanced Coder who applies human judgment, architecture, and critical thinking to orchestrate autonomous agents.

Full-Stack Development: JavaScript (ES6+), TypeScript, React, Next.js, Vue.js, Nuxt, Java (1.8-21), Spring Boot, Flutter, Elixir

Databases: PostgreSQL, Oracle PL/SQL, SQL, MongoDB, MySQL — schema design, migrations, query optimization

APIs & Integrations: REST APIs, Spring Boot REST, webhooks, third-party service integration

Infrastructure: Docker, Google Cloud (Pulumi IaC), Git/GitHub (branches, PRs, code review), CI/CD

Recent Experience

CTO & Co-founder | *Mobility Startup* 2024 – Present **Stack:** Elixir, Ash Framework, Flutter, Java 21 (Spring Boot), GraalVM, Google Cloud, Pulumi, Pi.dev, opencode

- Architected and developed a mobility platform powered by Agentic AI, orchestrating **agent harnesses (Pi.dev)** to design and implement the full agent lifecycle — skills, commands, workflows — applying architectural judgment and deep thinking to every technical decision.
- Daily integration of cost-efficient LLMs in production through structured prompt engineering and tool calling, optimizing costs without sacrificing performance through supervision and fine-tuned output control.
- Built the complete technology stack: frontend (Flutter), backend (Elixir/Ash, Java Spring Boot), relational database (PostgreSQL), REST APIs, and deployment on Google Cloud.
- Documented architecture decisions, technical choices, and internal processes for team scalability.

Java Associate Developer | *Perficient - Caterpillar* 2022 – 2023 **Stack:** Java 21 (Spring Boot), REST APIs, Git/GitHub

- Developed and maintained a global e-commerce system using Java, Spring Boot, and REST APIs with agile methodologies.
- Collaborated in multicultural teams across the US, India, and Latin America via GitHub workflow (branches, PRs, code review).

Java Specialist | *Citibank* 2021 – 2022 **Stack:** Java, Oracle SQL, Spring Beans, Git

- Delivered solutions for monthly requirements using internal framework (Java Bean Spring).
- Created and maintained client reports with optimized SQL queries.
- Led database migration from Sybase to Oracle in a multicultural team (US, Ukraine, India, Chile).

CTO | *Seven IT SpA (Hospital Cruz del Norte, SQM)* 2017 – 2020 **Stack:** Spring Boot (REST, MVC), PostgreSQL, JavaScript, Vuetify, Gitlab

- Full-cycle owner of a Healthcare Management System: from stakeholder requirements through implementation, deployment, and support.
- Developed frontend (JavaScript/Vuetify), REST backend (Spring Boot), relational database (PostgreSQL), and PDF report generation.
- Functional and technical leadership managing a team of 4 developers with Git-based workflow.

Java/Senior Developer | *WebClass, Creasys, Coopeuch, Others* 2008 – 2017 **Stack:** Java, SQL (PostgreSQL, Oracle, SQL Server), Git

- Full-cycle development for banking, ed-tech, and enterprise: analysis, design, implementation, QA, and maintenance.
- Collaboration in multicultural and cross-functional environments (Santander, Ripley, Coopeuch).

Education

Computer Science and Informatics Engineering | Universidad del Bío Bío Thesis: Extreme Programming (XP) — Theory and Practice.
