

- Full Name: **Gonzalo Oviedo Lambert**
- Role: *Backend Java Software Engineer*
- Address: Limache, Valparaíso Region, Chile | GMT-4 - UTC-4
- Email and Contact: goviedo.laboral@gmail.com | +56 9 6372 3603
- Social Media: [linkedin.com/in/gol]https://linkedin.com/in/gol | English (Intermediate B1 — daily communication in multicultural teams, actively progressing toward Upper-Intermediate)

Professional Summary

I am a **Backend Software Engineer** with strong expertise in **Java (Spring Boot)** and a proven track record developing and maintaining scalable, production-grade systems. My core experience spans **RESTful APIs, microservices architecture, relational and non-relational databases, and cloud infrastructure**. I have contributed across demanding sectors including global e-commerce (Perficient/Caterpillar), finance (Citibank), and healthcare, always following software design best practices.

I bring a **proactive, collaborative mindset** and have successfully worked in multicultural distributed teams. I am comfortable in fast-paced environments with shifting priorities, and I advocate for clear technical communication and user-centric development.

I also integrate **AI agent harnesses (Pi.dev)** into daily development workflows, applying technical judgment and deep architectural thinking to solve complex problems.

Technical Skills

Backend Core Languages: Java (8 - 21), **SQL Frameworks:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate **Architecture:** Microservices, RESTful APIs, Event-Driven Design, Design Patterns (GoF, MVC) **Databases:** PostgreSQL, Oracle PL/SQL, MongoDB, MySQL **Messaging:** Pub-Sub patterns, event-driven architecture

DevOps & Tools Cloud: Google Cloud Platform, Azure DevOps, Docker **CI/CD & Build:** Jenkins, GitLab CI, Gradle, Git **Testing:** JUnit, Mockito, TDD, Integration Testing, Regression Testing

Additional AI Agent Harnesses (Pi.dev), JavaScript, TypeScript, Vue.js, React, Flutter

Relevant Experience

CTO & Co-founder | *Mobility Startup* 2024 – Present **Technologies:** Java 21 (Spring Boot), Google Cloud, Docker, Microservices, REST APIs, Agentic AI (Pi.dev)

- Architected and developed a cloud-native mobility platform from scratch, designing and implementing microservices architecture.
- Built and deployed scalable RESTful APIs for real-time data processing, ensuring performance and reliability.
- Designed event-driven communication between services using pub-sub patterns for decoupled architecture.
- Implemented containerized deployments with Docker and cloud infrastructure automation (IaC).
- Applied **AI agent harnesses (Pi.dev)** to optimize development workflows, orchestrating agents with technical judgment for complex problem-solving.
- Followed TDD practices with JUnit and Mockito for comprehensive unit and integration test coverage.

Java Associate Developer | *Perficient - Caterpillar* 2022 – 2023 **Technologies:** Java 21 (Spring Boot), REST APIs, Microservices, Agile, TDD

- Developed and maintained a large-scale global e-commerce platform using Java and Spring Boot microservices.
- Designed and implemented RESTful APIs for high-traffic product catalog and order management services.
- Collaborated daily in cross-functional Scrum teams across the US, India, and Latin America.
- Participated in code reviews, test automation, and regression testing to maintain code quality.
- Troubleshoot and resolved production issues, ensuring platform reliability and performance.

Java Specialist | *Citibank* 2021 – 2022 **Technologies:** Java, Spring Beans, Oracle SQL, Jenkins, Gradle, Git, Jira, Confluence

- Delivered financial solutions for monthly requirements using Spring framework and enterprise Java.
- Developed and maintained reports and data processing pipelines for internal clients.
- Led a cross-continent database migration from Sybase to Oracle across teams in the US, Ukraine, India, and Chile.
- Collaborated in a multicultural, cross-functional agile environment.

CTO | *Seven IT SpA (Hospital Cruz del Norte, SQM)* 2017 – 2020 **Technologies:** Spring Boot (REST, MVC), PostgreSQL, Google Cloud, Docker, JavaScript

- Architected, developed, and deployed a full Healthcare Management System: medical records, nursing, kine-siology, and payment management.
- Built RESTful APIs and designed the database schema for transactional healthcare data.
- Managed cloud infrastructure on Google Cloud Platform and containerized applications with Docker.
- Led a team of 4 developers, managed requirements, code reviews, and quality assurance.

Java/Senior Developer | *WebClass, Creasys, Coopeuch, Others* 2008 – 2017 **Technologies:** Java, Spring, Hiber-nate, PostgreSQL, Oracle, SQL Server, Jenkins, Git

- Full-cycle software development: requirements analysis, design, implementation, testing, and deployment.
- Developed high-load transactional systems for banking (Santander, Coopeuch) and ed-tech platforms.
- Collaborated in multicultural teams and maintained rigorous testing and code quality standards.

Education

Computer Science Engineering | Universidad del Bío Bío Thesis: Extreme Programming (XP) — Theory and Practice.
