Professional Summary

I am a **Senior Software Engineer** with over 15 years of experience designing and developing critical, scalable, and microservices-oriented *full-stack* applications. My background highlights deep expertise in **Java (Spring Boot)** for the backend, and the use of **JavaScript (ES6+) and React / Vue.js** for modern interfaces, integrating both worlds through robust RESTful APIs.

On a daily basis, I work extensively with **agent software harnesses (like Pi.dev, opencode)**, acting as an **AI coder applying judgment and deep thinking** to solve complex problems. I integrate tools like *Windsurf, Pi.dev, Opencode, Copilot* into my workflow, which allows me to optimize development times and code quality. I have added value to demanding sectors, collaborating in agile environments taking extreme ownership and with solid experience in continuous integration and continuous delivery (CI/CD).

Technical Skills

Backend & Architecture: Java (1.8 - 21), Kotlin (Knowledge), Spring Boot, RESTful APIs, Microservices, Scalable Architectures, OOP.

Frontend: React, Vue.js, JavaScript (ES6+), TypeScript, Responsive Design.

AI Tools (Workflow): Agentic AI (Pi.dev, opencode), Windsurf, Pi.dev, Opencode, Copilot, integrating AI workflows to optimize code and architectures.

Databases: PostgreSQL, Oracle PL/SQL, MySQL, MongoDB.

Cloud & DevOps: Continuous Integration (Jenkins, Gitlab, Azure DevOps), Google Cloud Platform (Pulumi IaC), Docker.

Relevant Experience

CTO & Co-founder | *Mobility Startup* 2024 – Present

Technologies: Java 21 (Spring Boot), React, Elixir, Google Cloud, Pulumi, Agentic AI (Pi.dev, Opencode)

- *Full-stack* architecture and development of an AI-powered mobility platform, designing and implementing the agent lifecycle (skills, commands, workflow) in an execution harness.
- AI-assisted coding with **judgment and deep thinking**, using tools like **Google Antigravity** to design efficient and robust APIs.
- Creation and maintenance of continuous integration and delivery pipelines for applications.
- Implementation of automated cloud infrastructure with Pulumi and integration of frontend and backend systems.

Java Associative Developer | *Perficient - Caterpillar* 2022 – 2023

Technologies: Java 21 (Spring Boot), React, Microservices

- Development and maintenance of a large-scale global e-commerce system using Java and modern frontend frameworks.
- Deep integration of frontend and backend systems, ensuring performance, scalability, and responsive design.
- Worked under Scrum/Agile methodologies in distributed multicultural teams (U.S., India, and Latin America), maintaining high communication standards and client commitment.
- Took extreme ownership over assigned tasks, actively contributing with solutions and library improvements.

Java Specialist | *Citibank* 2021 – 2022

Technologies: Java, Spring Beans, Oracle SQL, Jenkins, Git, CI/CD

- Object-oriented architecture design and backend solutions development for complex financial requirements.

- System migration (Sybase to Oracle) ensuring data integrity of large volumes in critical environments.
- Continuous remote work in collaborative global teams (U.S., Ukraine, India, Chile).

CTO | *Seven IT SpA (Cruz del Norte Hospital, SQM)* 2017 – 2020

Technologies: Spring Boot (REST, MVC), JavaScript, Vue.js, PostgreSQL 9.6, Linux

- *Full-stack* applications development, creating and consuming RESTful APIs, and designing the entire architecture for the hospital system.
- Functional and technical leadership of a 4-developer team, optimizing frontend development practices.

Java/Senior Developer | *WebClass, Creasys, Coopeuch, Others* 2008 – 2017

Technologies: Java, Hibernate, PostgreSQL, Jenkins, Continuous Integration

- Full-cycle design and development for high-load platforms, building scalable backend services.

Education

Computer Science Execution Engineering | Universidad del Bío Bío

Thesis: Extreme Programming (XP) - Theory and practice. (4-year degree).
