Professional Summary

Results-driven Senior Full-Stack Architect and Lead Software Engineer with over 15 years of experience delivering high-performance, concurrent, and cloud-native systems. Expert in modernizing legacy architectures and building end-to-end applications from scratch using **Java (Spring Boot)**, **Elixir (Phoenix)**, **Node.js**, **React**, and **Flutter**. Proven track record of steering cross-functional teams, executing high-risk financial migrations, and optimizing cloud expenditures on AWS and GCP.

Pioneering Agentic AI Developer: Champion of modern software delivery, possessing extensive experience operating agentic harnesses such as **Pi.dev** and **opencode** to establish highly automated pipelines (**spec** → **plan** → **execute** → **verify**). Expert in leveraging AI to boost engineering velocity by **300%** while applying human architectural judgment, guardrails, and rigorous automated testing (E2E, unit, integration) to guarantee enterprise-grade security and reliability.

Technical Skills

- **Backend & Core:** Java (1.8 - 21), Spring Boot, Spring MVC, Elixir, Phoenix, Node.js, NestJS, REST APIs, Microservices, C++, Python.
 - **Frontend & Mobile:** React, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Vuetify, HTML5, CSS3, Flutter, PWA / SPA.
 - **Databases & Storage:** PostgreSQL, Oracle PL/SQL, MongoDB, Sybase, MySQL, SQL Server, query optimization.
 - **DevOps, Cloud & Tools:** Google Cloud (GCP), AWS, Docker, Kubernetes, Pulumi (IaC), GitLab CI/CD, GitHub, Jenkins, AS/400.
 - **Methodologies:** Extreme Programming (XP), Scrum / Agile, Automated Testing, Architecture Decisions, Stakeholder Management.
-

Professional Experience

Lead Software Engineer & Technical Architect | *Mobility Startup*

2024 – Present

Technologies: Elixir, Phoenix, Flutter, Java 21 (Spring Boot), Google Cloud, Pulumi IaC, Docker, Pi.dev, opencode, Git. - **Ecosystem Delivery:** Spearheaded the end-to-end architecture and launch of an enterprise-grade carpooling platform (live at app.tellevoapp.cl), successfully integrating two distinct **Flutter** mobile apps, a Java Spring Boot backend, and a comprehensive Progressive Web App (PWA). - **Velocity Boost:** Pioneered the deployment of autonomous software agents as the default execution layer using **Pi.dev** and **opencode**, elevating overall engineering delivery speed by **300%** and maintaining **99.98%** system stability. - **Cost & Latency Optimization:** Designed serverless APIs on Google Cloud Run and managed infrastructure with Pulumi IaC, slashing cloud hosting expenses by **45%** and reducing operational request latency by **30%**. - **Commercial & Legal Alignment:** Collaborated closely with general managers, legal experts, and commercial engineers to design secure, audit-ready data tracking structures and transit-compliant legal signature flows.

Senior Java & Full-Stack Developer | *Perficient - Caterpillar*

2022 – 2023

Technologies: Java 21 (Spring Boot), REST APIs, SQL, Docker, GitHub, GitLab, Agile. - **API Performance Optimization:** Refactored critical backend microservices and global e-commerce payment transaction flows, improving API response times by **35%** and reducing overall checkout cart abandonment by **12%**. - **Engineering**

Excellence: Standardized local development environments using Docker and enhanced JUnit test coverage to **85%**, which minimized post-release regressions by **18%**. - **Agile Integration:** Successfully collaborated across multi-region agile teams (US, India, LATAM), streamlining PR review cycles and reducing merge-approval times by **20%**.

Senior Java Specialist | *Citibank*

2021 – 2022

Technologies: Java, Oracle SQL, PL/SQL, Spring Beans, Git, Gradle, Jenkins. - **Database Modernization:** Directed the database migration of complex transactional structures from Sybase to Oracle, securely transferring over **15 Million financial records** with **0% data loss** and boosting transactional query speeds by **50%**. - **Automation & Cost Savings:** Developed custom monthly automated financial reporting systems, saving **120+ manual engineering hours monthly** and reducing system processing errors by **40%**. - **Cross-Border Collaboration:** Partnered with distributed engineering squads (US, Ukraine, India, Chile) under strict banking security guidelines, ensuring all services fully complied with international finance regulations.

Lead Developer & Tech Lead | *Seven IT SpA (Hospital Cruz del Norte, SQM)*

2017 – 2020

Technologies: Node.js, Spring Boot, PostgreSQL, JavaScript, jQuery, Vuetify, Google Cloud, Docker, GitLab CI/CD. - **Healthcare System Architecture:** Architected and launched from scratch a scalable Healthcare Management System, reducing clinical administrative processing times by **60%** and patient checkout queue times by **40%**. - **Team Leadership:** Managed and mentored a team of 4 full-stack developers, introducing GitLab CI/CD and Docker containerization, which decreased infrastructure cloud expenses on GCP by **30%**. - **Integrations & Billing:** Developed automated medical payment modules and secure billing systems, reducing administrative billing errors by **25%** and generating certified digital PDF reports.

Senior Software Engineer | *WebClass, Creasys, Coopeuch, Others*

2008 – 2017

Technologies: PHP, Java, .NET, C, Python, AS/400, Struts, Hibernate, PostgreSQL, SQL Server, Oracle. - **High-Scale Platform Delivery:** Built and scaled educational management platforms (WebClass) covering **1,800 schools**, accommodating over **500k+ daily active requests** while maintaining a **99.9% uptime**. - **Legacy Migrations:** Successfully led the digital migration of legacy financial structures (AS/400 to modern Java), automating tax integrations and saving corporate clients over **80 weekly hours of manual input**.

Education

Computer Science and Informatics Engineering

Universidad del Bío Bío

Thesis: Extreme Programming (XP) — Theory and Practice.
