

Gonzalo Oviedo Lambert

Senior Java / Spring Boot Developer Limache, Valparaíso Region, Chile (GMT-4) | goviedo.laboral@gmail.com | +56 9 6372 3603 linkedin.com/in/gol | English: Intermediate-Advanced (B1+, active in English-only teams)

Professional Summary

Senior Software Engineer with **15+ years of experience** building critical, scalable backend systems, with deep expertise in **Java (Spring Boot)** and **PostgreSQL**. Proven track record delivering high-availability solutions in the **finance (Citibank)**, **e-commerce (Perficient/Caterpillar)**, and **healthcare** sectors.

Experienced in **cloud-native deployments on GCP and AWS** (Lambda, VM, IaC with Pulumi), CI/CD pipelines, and distributed architectures. Comfortable operating in **all-English, multicultural environments** — I have collaborated daily with teams across the USA, India, Ukraine, and Latin America throughout my career.

Excited to join Equifax’s My Equifax (D2C) platform and contribute backend excellence at scale.

Core Technical Skills

Area	Technologies
Languages	Java 8 → 21, SQL
Frameworks	Spring Boot (REST, MVC, Beans), Hibernate, Struts
Databases	PostgreSQL, Oracle PL/SQL, MySQL, MongoDB
Cloud	Google Cloud Platform (GCP), AWS (Lambda), Azure
DevOps	
Infrastructure / IaC	Pulumi, Docker, Linux
CI/CD	Jenkins, GitLab CI, Gradle, Git
Frontend	JavaScript (ES6+), Vue.js, React, Angular (fundamentals)
Methodologies	Scrum / Agile, TDD, Code Review

Professional Experience

Lead Software Engineer | *Mobility Startup (Confidential)*

2024 – Present | Remote | **GCP · Java 21 · Spring Boot · Elixir · Docker · Pulumi**

- Architected and developed a full mobility platform backend using **Java 21 and Spring Boot**, deployed on **Google Cloud Platform** with Pulumi IaC.
- Reduced infrastructure provisioning time **from days to minutes** by automating cloud deployments with Pulumi, achieving **99.9% system uptime**.
- Integrated Agentic AI workflows to reduce operational overhead by **400%**, using cost-optimized LLMs without sacrificing performance.
- Led a team of 5 engineers to deliver the MVP in **under 4 months**.

Java Associate Developer | *Perficient — Caterpillar*

2022 – 2023 | Remote | **Java 21 · Spring Boot · Agile**

- Developed and maintained the **global e-commerce platform** processing **\$10M+ in daily transactions** using Java and Spring Boot.
- Collaborated in distributed teams across **3 continents** (USA, India, LATAM) with all communication conducted in English.
- Improved sprint delivery predictability by **25%** through structured code reviews and agile ceremonies.

Java Specialist | *Citibank*

2021 – 2022 | Santiago, Chile | Java · Spring Beans · Oracle SQL · Jenkins · WebSphere

- Delivered **100+ critical financial requirements** using an internal Java Spring Bean framework in a high-compliance banking environment.
 - Automated generation of **50+ monthly reports**, saving ~40 hours of manual work per month.
 - Led a **zero-downtime migration of 500GB+ of data** from Sybase to Oracle, coordinating a multicultural team of 15 across 4 countries (USA, Ukraine, India, Chile) — fully in English.
-

Tech Lead | *Seven IT SpA (Hospital Cruz del Norte / SQM)*

2017 – 2020 | Chile | Spring Boot · PostgreSQL 9.6 · GCP · Linux · JavaScript

- Architected and delivered a **Healthcare Management System** handling records for **10,000+ patients**, covering medicine, nursing, kinesiology, and payment modules.
 - Managed **PostgreSQL** schema design, query optimization, and production operations for the system's entire lifecycle.
 - Deployed the system on **Google Cloud VMs** and led a team of 4 frontend and backend developers, increasing deployment frequency by **50%** and reducing bug rates by **15%**.
-

Senior Java Developer | *WebClass · Creasys · Coopeuch · Others*

2008 – 2017 | Chile | Java · Hibernate · PostgreSQL · Oracle · SQL Server · Struts · Jenkins

- Full-cycle development of **20+ enterprise applications** across banking, ed-tech, and corporate sectors.
 - Migrated **100% of legacy AS/400 banking modules** to modern Java architecture, eliminating licensing costs and improving throughput by **40%**.
 - Delivered new features on an educational platform serving **1,800+ schools and 500,000+ active users**, contributing to a **15% revenue increase**.
 - Worked with multicultural teams at Santander, Ripley, and Coopeuch, regularly reading English technical documentation and communicating with international vendors.
-

Education

Computer Science and Informatics Engineering Universidad del Bío-Bío — Concepción, Chile *Thesis: Extreme Programming (XP) — Theory and Practice*

Languages

Language	Level
Spanish	Native
English	Intermediate-Advanced — B1+, experienced in daily English meetings with international teams (USA, India, Ukraine). Active participation in stand-ups, code reviews, and technical discussions.

Additional Highlights

- **Finance / regulated environments:** Citibank, Coopeuch, Santander, Ripley
- **Global collaboration:** 5+ countries, 3 continents, 15+ years of multicultural team experience
- **Cloud platforms:** GCP (primary), AWS Lambda, Azure DevOps — directly aligned with the AWS/GCP requirement
- **Availability:** Immediate | Hours: 09:00–18:00 Chilean time (aligned with role)
