

Gonzalo Oviedo Lambert

Senior Backend Developer — Java · Spring Boot · REST APIs · AI Agent Harnesses Chile (GMT-4) · Available for Santiago hybrid 2x3 · goviedo.laboral@gmail.com · +56 9 6372 3603 linkedin.com/in/gol · English: professional working proficiency (daily meetings with USA, India and Ukraine teams)

Professional Summary

Senior Backend Developer with **15+ years building and modernizing Java and Spring Boot platforms**, well beyond the 4+ years required for this role. Proven delivery of mission-critical backend services in highly regulated and high-availability domains: **banking (Citibank)**, **global e-commerce (Perficient / Caterpillar)**, **healthcare (Seven IT)** and a **carpooling system (end to end full to GCP)**. .

Strong track record designing and maintaining **REST APIs**, decision and business-rule logic, and data integration processes on **PostgreSQL and Oracle PL/SQL** — the same building blocks behind a decisioning platform such as **InterConnect**.

I have worked for years inside **distributed, English-speaking, multicultural teams** (USA, India, Ukraine, LATAM), participating daily in stand-ups, code reviews and technical discussions — the exact working mode of Equifax's Santiago Development Center.

As a differentiator, I run my daily backend work through **AI agent harnesses (Pi.dev, Claude Code, OpenCode)**: I do not merely delegate to them, I orchestrate them with architectural judgement and deep reasoning across design, implementation, testing and deployment.

Core Technical Skills

Primary Specialization

- **Java (1.8 → 21)** — 15+ years, enterprise backend, microservices
- **Spring Boot** — REST, MVC, Spring Beans, dependency injection, service layers
- **REST API design** — building, consuming and integrating services across systems
- **SQL / PL-SQL** — Oracle PL/SQL and PostgreSQL: stored procedures, migrations, query optimization
- **Databases** — PostgreSQL, Oracle, MySQL, MongoDB

Engineering & DevOps

- **Testing** — unit testing, debugging, multi-environment validation
- **Build & dependencies** — Maven, Gradle
- **CI/CD & tooling** — Jenkins, GitLab CI, Git, GitHub, Bitbucket, Postman
- **Cloud & containers** — Google Cloud Platform (Pulumi IaC), AWS Lambda, Docker, Linux
- **Process** — Scrum, agile ceremonies, JIRA, Confluence, code review

Differentiator — AI-Assisted Engineering

Daily orchestration of autonomous coding agent harnesses (Pi.dev, Claude Code, OpenCode). I design and extend custom harnesses — skills, hooks, commands and workflows — to write, debug, test and refactor Java/Spring Boot and PL/SQL code. This is applied engineering judgement, not tool consumption: I define the architecture and the boundaries, the agents execute inside them. Sustained development-cycle acceleration of up to **300%**, with peaks above **2000%** on highly repetitive tasks (scaffolding, test generation, large-scale refactoring), without compromising code quality or maintainability.

Professional Experience

Lead Software Engineer — Mobility Platform Startup (Confidential)

2024 – Present | Remote | Java 21 · Spring Boot · GCP · Docker · Pulumi

- Architected and developed the backend of a shared-mobility platform in **Java 21 / Spring Boot**, complemented by Elixir/Phoenix services.
- Designed and built **REST APIs** integrating external mapping, payment and notification providers.
- Automated infrastructure as code (**Pulumi**) on **Google Cloud Platform**, cutting provisioning from days to minutes.
- Established and operates the team's **AI agent harness practice (Pi.dev)** — defining agent lifecycle, skills and workflows to accelerate backend delivery by ~300%.
- Technical leadership of the full stack: coding standards, architecture decisions and code review culture.

Java Associate Developer — Perficient / Caterpillar

2022 – 2023 | Remote | Java · Spring Boot · REST · Scrum

- Developed and maintained a **global e-commerce platform** in **Java and Spring Boot**, with **REST API** integrations for logistics, inventory and payments.
- Worked under **Scrum** in a distributed multicultural team across **USA, India and LATAM**, with **all communication in English**.
- Git version control, unit testing and code reviews integrated into the CI/CD pipeline.

Java Specialist — Citibank

2021 – 2022 | Santiago, Chile | Java · Spring Beans · Oracle PL/SQL · SOAP · Jenkins

- Built backend solutions for digital banking in **Java / Spring Beans**, with business logic in **PL/SQL** and legacy integration through **SOAP** services.
- Contributed to a **Sybase → Oracle database migration** working directly on stored procedures and PL/SQL scripts, within a multicultural team spanning **USA, Ukraine, India and Chile** — **operating fully in English**.
- Requirements and technical documentation in **JIRA and Confluence**; CI/CD with **Jenkins**.
- Delivered inside a high-compliance financial environment where correctness and auditability were non-negotiable.

Tech Lead — Seven IT SpA (Hospital Cruz del Norte / SQM)

2017 – 2020 | Chile | Spring Boot · PostgreSQL · GCP · GitLab

- Architected and delivered a **Healthcare Management System** backend on **Spring Boot (REST, MVC)** with **PostgreSQL**, owning schema design, queries and in-database business logic.
- Built the payments management and administrative reporting modules.
- Deployed on **Google Cloud Platform** VMs with **GitLab** continuous integration.
- Technical and functional leadership of a 4-developer team.

Senior Java Developer — WebClass, Creasys, Coopeuch, Banco Santander

2008 – 2017 | Chile | Java · Struts · Hibernate · Oracle · PostgreSQL · SQL Server

- Full-cycle development (analysis, design, implementation, QA, debugging) for banking, ed-tech and retail.
- Implemented **REST and SOAP** integration services for banking operations and electronic invoicing.
- Led banking modernization work, migrating legacy **AS/400** modules to a Java architecture.
- Production incident management, technical documentation and version control with Git and Bitbucket.

Education

Computer Science and Informatics Engineering — Universidad del Bío-Bío, Chile Thesis: *Extreme Programming (XP) — Theory and Practice*

Languages

- **Spanish** — Native
 - **English** — Professional working proficiency. Years of daily work in English-only environments (Citibank: USA/Ukraine/India; Perficient: USA/India), including stand-ups, code reviews, technical documentation and vendor communication. Continuously improving toward full fluency.
-

Role Fit — Equifax InterConnect (via 23people)

- **Java:** 15+ years (requirement: 4+) · **Spring Boot:** 15+ years across finance, e-commerce and healthcare (requirement: 4+)
- **Decisioning-style backends:** business rules, PL/SQL logic and REST integrations in banking-grade systems
- **International collaboration:** daily English with distributed teams — the SDC working model
- **Availability:** immediate, aligned with the 09:00–18:00 schedule and the hybrid 2x3 model in Chile
