

Gonzalo Oviedo Lambert

Staff Java Software Engineer / AI-Augmented Engineering Lead

Santiago, Chile (GMT-4 / UTC-4) | goviedo.laboral@gmail.com | +56 9 6372 3603

linkedin.com/in/gol | Professional working proficiency — 6+ years in fully English-speaking distributed teams (US, India, Ukraine)

Professional Summary

Lead Java engineer with 15+ years of experience architecting transactional backend systems, financial APIs, and payment flow integrations. Focuses on end-to-end system design and unsupervised team mentorship across US, India, and Latin American financial sectors. Integrates agentic workflows using software agent harnesses (such as Pi.dev and opencode) to automate quality verification gates and accelerate development loops.

Technical Skills

- **Core Languages & Frameworks:** Java (8 - 21), Spring Boot, PL/SQL, Elixir (Phoenix Framework)
 - **Databases & Storage:** Oracle SQL, PostgreSQL, MySQL, MongoDB
 - **Cloud, DevOps & Infrastructure:** Google Cloud Platform (GCP), Azure DevOps, Docker, Pulumi (IaC), AWS Lambda
 - **AI-Augmented Development:** Software Agent Harnesses (Pi.dev, opencode, Hermes), LLM Orchestration, Prompt Engineering
 - **Architecture & Methodologies:** RESTful APIs, System Design, Microservices, Extreme Programming (XP), Agile/Scrum
-

Professional Experience

Lead Software Engineer & Technical Architect | *Mobility Startup*

2024 – Present

Technologies: Java 21, Spring Boot, GraalVM, Google Cloud Platform (GCP), Pulumi (IaC), Elixir, Ash Framework, Flutter, Agentic AI with Pi.dev & opencode

- Designed and built the entire core backend services utilizing Java 21 and Spring Boot, optimizing performance and hosting on serverless GCP Cloud Run.
- Built autonomous agent workflows using software agent harnesses (Pi.dev/opencode) to manage development tasks, quality gates, and automated test execution.
- Automated infrastructure deployments on GCP using Pulumi (IaC), maintaining clean development, staging, and production parity.
- Mentored a distributed engineering team and drove technical decisions without external supervision.

Java Associate Developer | *Perficient - Caterpillar*

2022 – 2023

Technologies: Java, Spring Boot, Agile, Git, REST APIs

- Maintained global e-commerce backend microservices in Java/Spring Boot, ensuring strict integration with inventory and financial accounting modules.
- Collaborated daily in English-speaking distributed teams across the US, India, and Latin America under Agile sprints.

Java Specialist | *Citibank*

2021 – 2022

Technologies: Java, Oracle PL/SQL, Spring, Jenkins, Gradle, WebSphere, Git

- Migrated critical legacy financial databases from Sybase to Oracle, preserving 15M+ active transactional records under strict zero-downtime requirements.
- Built automated reporting pipelines for compliance and regulatory audits, interfacing directly with teams in the US, Ukraine, India, and Chile.
- Maintained monthly banking compliance microservices using Citibank's internal Spring-based enterprise frameworks.

Lead Software Engineer & Solutions Architect | *Seven IT SpA (Hospital Cruz del Norte, SQM)*

2017 – 2020

Technologies: Spring Boot, PostgreSQL, Linux, Google Cloud (VM), GitLab, JavaScript, Bootstrap

- Directed technical architecture and development of the core Hospital Management System (HMS) for clinical and administrative operations.
- Developed the secure patient billing module and financial tracking engines.
- Supervised a co-located team of 4 software developers, coordinating sprint planning and delivery schedules.

Java Senior Developer | *WebClass, Creasys, Coopeuch, Others*

2008 – 2017

Technologies: Java, AS/400, Struts, JSP, Hibernate, PostgreSQL, Oracle, SQL Server, Jenkins

- Managed legacy AS/400 migrations to Java-based services for banking clients including Coopeuch, Ripley, and Santander.
- Built electronic invoicing engines and transaction processors handling regional financial operations.
- Developed new administrative modules for an educational platform deployed at 1,800 schools, serving 500,000 daily user requests.
- Analyzed business requirements, system design, development, and QA for bank and ed-tech applications.

Education

B.S. in Computer Science and Software Engineering (*Ingeniería en Ejecución en Computación e Informática*)

Universidad del Bío Bío

Thesis: Extreme Programming (XP) - Theory and Practice
