 - English B2 — daily stand-ups, code reviews and technical discussion with teams in the US, India and Ukraine
-

Professional Summary

Senior backend developer, 15+ years in Java and Spring Boot. Built transactional systems for banking (Citibank), global e-commerce (Caterpillar) and healthcare on PostgreSQL, deployed on GCP and AWS. Six years working daily in English with distributed teams across the US, India and Ukraine.

Technical Skills

- **Backend:** Java (1.8 to 21), Spring Boot, Spring MVC, REST APIs, JPA/Hibernate, Maven, Gradle.
 - **Databases:** PostgreSQL (schema design, queries, stored procedures, tuning), Oracle PL/SQL, SQL Server, MySQL, MongoDB.
 - **Cloud:** Google Cloud Platform (Compute Engine, Cloud Run, Pulumi IaC), AWS (Lambda, S3), Docker, Linux.
 - **Delivery:** Scrum and daily meetings, Jenkins, GitLab CI, Git, Jira, Confluence, code review, automated tests as a quality gate.
 - **AI-assisted engineering:** Claude Code (Max plan) as primary coding harness — I define the architecture and the boundaries, the agents execute inside them. Prior experience with Pi.dev and opencode.
 - **Frontend (secondary):** Vue.js (Nuxt), React, Flutter, JavaScript.
-

Professional Experience

Tech Lead | *Mobility Platform Startup (confidential)* — 2024 – Present

Java 21, Spring Boot, GraalVM, Elixir, Google Cloud, Pulumi IaC, Docker.

- Own the backend architecture end to end for a platform running in production with real users since 2024.
- Build and maintain the REST API layer integrating mapping, payment and notification providers.
- Automated the whole GCP footprint with Pulumi (IaC) on Docker containers — no manual deployment steps.
- Set up the team's coding-agent workflow (spec, plan, execution, verification) with an automated test suite as the quality gate.

Java Associate Developer | *Perficient – Caterpillar* — 2022 – 2023

Java, Spring Boot, REST, Scrum.

- Developed and maintained Caterpillar's global e-commerce platform in Java and Spring Boot.
- Worked in a distributed Scrum team across the US, India and LATAM, with all communication in English — daily stand-ups, refinement and code review.

Java Specialist | *Citibank* — 2021 – 2022

Java, Spring Beans, Oracle PL/SQL, Sybase, Jenkins, Gradle, WebSphere, Jira, Confluence.

- Ran the migration of financial databases from Sybase to Oracle: 15M+ records, no data loss, inside a bank with strict regulatory and audit requirements.

- Delivered the bank's monthly change requests on the internal Java/Spring framework, following corporate methodology and standards.
- Built and maintained reporting for internal clients against agreed SLAs.
- Fully English-speaking team spanning the US, Ukraine, India and Chile.

Tech Lead | *Seven IT SpA — Hospital Cruz del Norte, SQM — 2017 – 2020*

Spring Boot (REST, MVC), PostgreSQL 9.6, Google Cloud, Linux, GitLab.

- Designed and delivered a Healthcare Management System used daily by clinical staff (medicine, nursing, physiotherapy).
- Owned the PostgreSQL side: schema design, queries and in-database business logic for the clinical and billing modules.
- Deployed and operated the system on Google Cloud with GitLab continuous integration.
- Led a team of 4 developers (front and backend) through code and design reviews.

Senior Java Developer | *WebClass, Creasys, Coopeuch and others — 2008 – 2017*

Java, Struts, Hibernate, JSP, Oracle, PostgreSQL, SQL Server, AS/400, Jenkins.

- Full-cycle development — analysis, design, implementation, QA — for banking, retail and ed-tech clients (Santander, Ripley, Coopeuch).
- Migrated legacy AS/400 banking modules to a Java architecture, including the functional analysis of the existing batch processes.
- Built electronic invoicing and handled production incidents on customer-facing systems.
- Added features to an ed-tech platform serving 1,800 schools and 500k daily requests.

Education

- **Computer Science and Informatics Engineering (Ingeniería en Ejecución en Computación e Informática)** — Universidad del Bío-Bío, Chile, 2005 – 2009. Graduated. Thesis: *Extreme Programming (XP) — Theory and Practice*.

Languages

- **Spanish** — native.
- **English** — B2. Six years inside English-only distributed teams (Citibank: US, Ukraine, India; Perficient: US, India): daily meetings, code review and technical documentation.

Role Fit — My Equifax (D2C)

- **4+ years Java** — 15+ years, from Java 1.8 to Java 21.
- **4+ years Spring Boot** — since 2017 at Seven IT, and the current stack today.
- **4+ years PostgreSQL** — Seven IT (2017–2020), earlier at Creasys/WebClass, and the platform I run now.
- **4+ years cloud (AWS/GCP)** — GCP since 2017, with Pulumi IaC since 2024; AWS Lambda and S3.
- **English B2, daily meetings** — English-only teams at Citibank and Perficient, 2021–2023.
- **Degree in Informatics/Systems Engineering** — Universidad del Bío-Bío, graduated.
