Professional Summary

Software engineer with 15+ years building backend systems for banking, healthcare, and high-traffic education platforms. Since 2024 I build in **Elixir** — my favorite language: simple, powerful, and a pleasure to work with. I run three Elixir/Phoenix systems in production (app.tellevoapp.cl, www.tellevoapp.cl, farma.limachelocales.cl), all developed with agentic coding workflows: code agents (Claude Code, Pi.dev, opencode) operating inside a spec → plan → execute → verify loop, gated by an automated test suite. I take end-to-end ownership of the architecture — from system design to production — and mentor engineers without supervision.

Technical Skills

- **Elixir & BEAM:** Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP (GenServers, Supervisors, supervision trees), ExUnit.
 - **Agentic AI Engineering:** coding-agent harnesses (Claude Code, Pi.dev, opencode); prompting, guiding, and reviewing AI-generated code; implementing code agents to automate engineering tasks; agent instruction design (skills, commands, workflows); automated verification loops.
 - **APIs & Databases:** designing and implementing RESTful web services, API integration, PostgreSQL, Oracle PL/SQL, MySQL, MongoDB.
 - **Cloud & CI/CD:** Google Cloud Platform (Cloud Run, VM), Pulumi (IaC), Docker, GitLab CI/CD, Jenkins — continuous integration and delivery of applications.
 - **Methodologies:** Agile/Scrum, TDD, automated test suites as quality gates, SOLID, Clean Code.
 - **Earlier stack:** Java (1.8 to 21, Spring Boot), Flutter, Vue.js — 15 years across banking and enterprise systems.
-

Professional Experience

Tech Lead & Elixir Engineer | *Mobility Startup* — *TeLlevoApp* (2024 – Present)

Technologies: Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP, PostgreSQL, Google Cloud, Pulumi IaC, Docker, Claude Code, Pi.dev, opencode.

- Own two Elixir systems in production: www.tellevoapp.cl, a full Elixir/Phoenix site, and app.tellevoapp.cl, a carpooling platform with real users since 2024 whose entire web frontend is built in **Phoenix LiveView**.
- Modeled the platform's domain on **Ash Framework**, with OTP supervision trees for fault-tolerant concurrent processing.
- Designed and operate the team's agentic development workflow: code agents run every feature through a spec → plan → execute → verify loop; I prompt, guide, and review the AI-generated code before merge, with the automated test suite as the quality gate.
- Built and shipped farma.limachelocales.cl, a pharmaceutical price comparator in **Phoenix LiveView** that searches Chile's main pharmacy chains — a personal product developed end-to-end with code agents.
- Automated the entire GCP infrastructure with Pulumi (IaC) on Cloud Run serverless containers.

Java Specialist | *Citibank* (2021 – 2022)

Technologies: Java, Oracle SQL, Spring, Jenkins, Gradle, WebSphere.

- Executed the migration of financial databases from Sybase to Oracle — over 15 million records with zero data loss — under strict banking regulation, working on large, complex transactional systems.
- Coordinated technically in English within a distributed team across the US, Ukraine, India, and Chile.

Tech Lead | *Seven IT SpA* — *Hospital Cruz del Norte, SQM* (2017 – 2020)

Technologies: Spring Boot (REST, MVC), PostgreSQL 9.6, Google Cloud, Linux, GitLab.

- Led the design and delivery of a Healthcare Management System (medicine, nursing, physiotherapy modules) used daily by clinical staff, backed by **PostgreSQL** and RESTful web services.
- Mentored a team of 4 developers through code reviews and design sessions; built the transactional payments and billing module.

Other experience (2008 – 2023, condensed)

- **Perficient** — **Caterpillar** (2022 – 2023): Java/Spring Boot modules for Caterpillar’s global e-commerce system, in fully English-speaking **Agile/Scrum** teams distributed across the US, India, and Latin America.
- **WebClass, Creasys, Coopeuch and others** (2008 – 2017): full-cycle development for banking and ed-tech clients (Santander, Ripley, Coopeuch); extended an education platform serving 1,800+ schools with 500k+ daily requests; led AS/400 → Java legacy migrations.

Education & Languages

- **Computer Science & Informatics Engineering** (university degree) — Universidad del Bío-Bío. Thesis: Extreme Programming (XP), theory and practice.
- **Languages:** Spanish (native) · English (professional working proficiency — daily written and spoken use in distributed teams).
