Professional Summary

Backend engineer with 15+ years building **Java/Spring Boot** platforms for banking, healthcare, and high-traffic education systems. I take end-to-end ownership of the architecture — from system design to production — and mentor engineering teams without supervision. Currently operating a mobility platform live in production since 2024 (app.tellevoapp.cl) on **Google Cloud**, with infrastructure fully automated in **Pulumi (IaC)**. I work daily with agentic coding harnesses (**Pi.dev**, **opencode**): I designed my team's agent workflow — spec, plan, execute, verify — gated by an automated test suite.

Technical Skills

- **Backend:** Java (1.8 to 21), Spring Boot, microservices, REST APIs, JPA/Hibernate; Elixir (Phoenix, Ash Framework), GraalVM.
 - **Databases:** PostgreSQL, Oracle PL/SQL, MySQL, SQL Server, MongoDB.
 - **Cloud & Infrastructure:** Google Cloud Platform (GCP), Pulumi (IaC), Docker, Cloud Run serverless, AWS Lambda, Azure DevOps.
 - **Agentic AI:** coding-agent harnesses (Pi.dev, opencode, Hermes), LLM orchestration, agent lifecycle design (skills, commands, workflows).
 - **CI/CD & Quality:** Jenkins, GitLab, Git, Gradle, automated test suites as quality gates, SOLID, Clean Code.
 - **Frontend & Mobile (secondary):** Flutter, Vue.js (Nuxt), React, JavaScript.
-

Professional Experience

Tech Lead | Mobility Startup — app.tellevoapp.cl (2024 – Present)

Technologies: Java 21 (Spring Boot), GraalVM, Elixir, Ash Framework, Flutter, Google Cloud, Pulumi IaC, Docker, Pi.dev, opencode.

- Own the end-to-end architecture of a carpooling platform running in production with real users since 2024.
- Automated the entire GCP infrastructure with Pulumi (IaC), migrating workloads to Cloud Run serverless containers.
- Designed and rolled out the team's coding-agent workflow (spec → plan → execute → verify) on Pi.dev and opencode, integrating cost-efficient LLMs with an automated test suite as the quality gate.
- Built the full technology stack and lead the technical team, enforcing SOLID and Clean Code principles.

Java Associate Developer | Perficient — Caterpillar (2022 – 2023)

Technologies: Java (Spring Boot), Git, Agile methodologies.

- Developed and maintained modules of Caterpillar's global e-commerce system in Java/Spring Boot.
- Collaborated in fully English-speaking agile teams distributed across the US, India, and Latin America.

Java Specialist | *Citibank* (2021 – 2022)

Technologies: Java, Oracle SQL, Spring, Jenkins, Gradle, WebSphere.

- Executed the migration of financial databases from Sybase to Oracle — over 15 million records with zero data loss — under strict banking regulation.
- Produced monthly data-processing reports for internal clients, meeting the bank's SLAs.
- Worked in a distributed team across the US, Ukraine, India, and Chile, coordinating technically in English.

Tech Lead | *Seven IT SpA — Hospital Cruz del Norte, SQM* (2017 – 2020)

Technologies: Spring Boot (REST, MVC), PostgreSQL 9.6, Google Cloud (VM), Linux, GitLab.

- Led the design and delivery of a Healthcare Management System (medicine, nursing, physiotherapy modules) used daily by clinical staff.
- Mentored a team of 4 developers (frontend and backend) through code reviews and design sessions.
- Built the transactional payments and billing module with automated PDF reporting for the administration.

Java Senior Developer | *WebClass, Creasys, Coopeuch and others* (2008 – 2017)

Technologies: Java, AS/400, Struts, Hibernate, PostgreSQL, Oracle, SQL Server, Jenkins.

- Delivered full-cycle development — requirements, design, build, QA — for banking, ed-tech, and enterprise clients (Santander, Ripley, Coopeuch).
- Led legacy migrations from AS/400 to Java and electronic invoicing integrations for financial institutions.
- Extended WebClass's education platform, serving more than 1,800 schools with 500k+ daily requests, shipping features that enabled additional sales.

Education & Languages

- **Computer Science & Informatics Engineering** — Universidad del Bío-Bío. Thesis: Extreme Programming (XP), theory and practice.
- **Languages:** Spanish (native) · English (professional working proficiency — daily written and spoken use in distributed teams).
