

Gonzalo Oviedo Lambert

Senior Software Engineer | Elixir/Phoenix · Event-Driven & CQRS · Cloud Infrastructure as Code
Chile (UTC-4) — Fully Remote, South America goviedo.laboral@gmail.com | +56 9 6372 3603 linkedin.com/in/gol
| English B1 (Intermediate)

Professional Summary

Senior Software Engineer and Technical Architect with **15+ years** delivering distributed, high-availability backends. I work daily in **Elixir, Phoenix and Phoenix LiveView** on the BEAM, applying **OTP** — GenServers, Supervisors and supervision trees — to build systems that isolate failure and self-heal.

My architectural focus is **event-driven design and CQRS** over **PostgreSQL** and **RabbitMQ**, backed by a strong infrastructure practice: containerized services with **Docker/Kubernetes**, full **Infrastructure as Code** with **Pulumi**, and CI/CD pipelines on **GitHub Actions**, GitLab CI and Jenkins.

I bring **15M+ record, zero-data-loss migration** experience from Citibank and high-throughput platform experience serving **500k+ daily requests at 99.9% uptime**.

I run **agentic AI harnesses** (Claude Code, Pi.dev, opencode) as my default execution layer under a **spec → plan → execute → verify** discipline, lifting delivery velocity **300%** while holding **99.98%** system stability.

Technical Skills

- **Elixir & BEAM:** Elixir, Phoenix, **Phoenix LiveView**, Ash Framework, OTP (GenServers, Supervisors, supervision trees), ExUnit, concurrent and fault-tolerant design.
 - **Architecture:** **CQRS**, **event-driven architecture**, microservices, distributed systems, Clean/Hexagonal Architecture, Domain-Driven design principles, SOLID, REST APIs, WebSockets.
 - **Data:** **PostgreSQL** (modeling, indexing, query optimization, large-scale migration), Oracle PL/SQL, MySQL, SQL Server, MongoDB, Redis.
 - **Messaging:** **RabbitMQ**, Kafka, Elasticsearch, Kibana.
 - **Cloud & IaC:** **Pulumi (Infrastructure as Code)**, Google Cloud (Cloud Run, Cloud SQL, Cloud Storage), **AWS (Lambda)**, **Docker**, **Kubernetes**, Cloudflare Workers.
 - **CI/CD:** **GitHub Actions**, GitLab CI/CD, Jenkins, Azure DevOps, Git.
 - **Other languages:** Java (8-21) / Spring Boot, TypeScript / JavaScript, Node.js, Python, SQL, Bash.
 - **Agentic AI:** Claude Code, Pi.dev, opencode, Playwright MCP, LLM integration, agent orchestration.
 - **Quality:** TDD, ExUnit, JUnit, Mockito, 80%+ coverage, OpenAPI/Swagger, Extreme Programming.
-

Professional Experience

Lead Software Engineer & Technical Architect | *Mobility Startup 2024 – Present* **Stack:** Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP, Java 21, Google Cloud, Pulumi IaC, Docker, Claude Code, Pi.dev, opencode.

- **Two Elixir/Phoenix systems in production:** www.tellevoapp.cl (full Elixir/Phoenix site) and app.tellevoapp.cl, whose entire frontend is built in **Phoenix LiveView**.
- **Concurrency and resilience:** architected the platform on **Elixir/Ash Framework**, implementing **OTP** supervision trees and GenServers for fault isolation under production load.
- **Event-driven distributed design:** structured the system as microservices with asynchronous communication across bounded contexts.
- **Infrastructure as Code:** automated the entire cloud footprint with **Pulumi** on GCP and containerized services with Docker; serverless APIs cut hosting cost **45%** and request latency **30%**.
- **Reliability at speed:** sustained **99.98%** stability while increasing team delivery velocity **300%** through agentic AI workflows with rigorous automated verification (E2E, unit, integration).

Senior Java & Full-Stack Developer | *Perficient — Caterpillar 2022 – 2023* **Stack:** Java 21 (Spring Boot), microservices, REST APIs, SQL, Docker, GitHub, GitLab, Agile.

- Refactored critical backend microservices and global e-commerce payment transaction flows: **35%** faster API response, **12%** less cart abandonment.
- Standardized Docker-based local environments and raised JUnit coverage to **85%**, reducing post-release regressions **18%**.
- Reduced merge-approval times **20%** across distributed teams (US, India, LATAM).

Senior Java Specialist | *Citibank 2021 – 2022* **Stack:** Java, Oracle SQL, PL/SQL, Spring Beans, Jenkins, Gradle, WebSphere.

- Migrated complex transactional structures from Sybase to Oracle: **15M+ financial records, 0% data loss, 50%** faster queries.
- Automated monthly financial reporting, saving **120+ engineering hours monthly** and cutting processing errors **40%**.
- Delivered under strict banking security standards with squads across US, Ukraine, India and Chile.

Lead Developer & Tech Lead | *Seven IT SpA (Hospital Cruz del Norte, SQM) 2017 – 2020* **Stack:** Node.js, Spring Boot, PostgreSQL, Vue.js, Google Cloud, Docker, GitLab CI/CD.

- Architected a healthcare management platform from scratch, cutting clinical administrative processing time **60%**.
- Led and mentored 4 engineers; introduced GitLab CI/CD and Docker, reducing GCP spend **30%**.

Senior Software Engineer | *WebClass, Creasys, Coopeuch and others 2008 – 2017* **Stack:** Java, PHP, .NET, C, Python, AS/400, Struts, Hibernate, PostgreSQL, SQL Server, Oracle.

- Scaled an education platform to **1,800 schools** and **500k+ daily active requests** at **99.9% uptime**.
- Led legacy migrations (AS/400 → modern Java), saving clients **80+ manual hours weekly**.

Education

Computer Science and Informatics Engineering — Universidad del Bío Bío *Thesis: Extreme Programming (XP) — Theory and Practice.*
