

Gonzalo Oviedo Lambert

Senior Software Engineer | Elixir/Phoenix/OTP · Event-Driven Systems · GCP & Kubernetes
Chile (UTC-4) — Fully Remote, Latin America goviedo.laboral@gmail.com | +56 9 6372 3603 linkedin.com/in/gol
| English B1 (Intermediate)

Professional Summary

Senior Software Engineer with **15+ years** designing and operating scalable, concurrent, distributed backends. Strong proficiency in **Elixir and Phoenix on the BEAM**, with production experience in **OTP** — GenServers, Supervisors and supervision trees for fault tolerance — plus **Phoenix LiveView** for real-time interfaces.

Deep complementary strength in the exact operational stack of high-volume commerce platforms: **PostgreSQL** modeling and query optimization at scale, **event-driven microservices**, **RabbitMQ/Kafka** messaging, and **Docker/Kubernetes on Google Cloud** managed as Infrastructure as Code with **Pulumi**.

Direct domain exposure to **global e-commerce and fulfillment flows** at Caterpillar (Perficient), where I optimized payment transaction paths and backend microservices, and to **high-integrity transactional data** at Citibank, migrating 15M+ financial records with zero data loss.

I operate **agentic AI harnesses** (Claude Code, Pi.dev, opencode) as my daily execution layer under a **spec → plan → execute → verify** discipline, which raised delivery velocity **300%** while holding **99.98%** system stability.

Technical Skills

- **Elixir & BEAM:** Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP (GenServers, Supervisors, supervision trees), concurrent and fault-tolerant design, ExUnit.
 - **Databases:** **PostgreSQL** (modeling, indexing, query optimization, large-scale migrations), Oracle PL/SQL, MySQL, SQL Server, Sybase, MongoDB, Redis.
 - **Messaging & Events:** **RabbitMQ**, Kafka, WebSockets, event-driven architecture, CQRS, microservices.
 - **Cloud & Infrastructure:** **Google Cloud** (Cloud Run, Cloud SQL, Cloud Storage), AWS (Lambda), **Docker**, **Kubernetes**, **Pulumi (IaC)**, GitLab CI/CD, GitHub Actions, Jenkins.
 - **Other Languages:** Java (8–21) / Spring Boot, TypeScript / JavaScript, Node.js, Python, SQL, Bash.
 - **Architecture & Practice:** Distributed systems, Clean/Hexagonal Architecture, SOLID, REST APIs, OpenAPI/Swagger, TDD, 80%+ test coverage, Extreme Programming, Scrum/Kanban.
 - **Agentic AI:** Claude Code, Pi.dev, opencode, Playwright MCP, LLM integration, agent orchestration.
-

Professional Experience

Lead Software Engineer & Technical Architect | *Mobility Startup 2024 – Present* **Stack:** Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP, Java 21, Google Cloud, Pulumi IaC, Docker, Claude Code, Pi.dev.

- **Two Elixir/Phoenix systems in production:** www.tellevoapp.cl (full Elixir/Phoenix site) and app.tellevoapp.cl, with its entire frontend built in **Phoenix LiveView**.
- **Concurrency and fault tolerance on the BEAM:** architected the platform in **Elixir/Ash Framework**, implementing **OTP** supervision trees and GenServers so failures stay isolated and the system self-heals under load.
- **Distributed, event-driven design:** built the platform as microservices with asynchronous communication between bounded contexts.
- **Cloud and Kubernetes-era infrastructure:** automated the full GCP footprint with **Pulumi IaC** and containerized services with Docker; serverless APIs on Cloud Run cut hosting cost **45%** and latency **30%**.
- **Reliability:** sustained **99.98%** system stability while raising team delivery speed **300%** through disciplined agentic AI workflows and rigorous automated testing.

Senior Java & Full-Stack Developer | *Perficient — Caterpillar 2022 – 2023* **Stack:** Java 21 (Spring Boot), microservices, REST APIs, SQL, Docker, GitHub, GitLab, Agile.

- **Commerce and fulfillment flows:** refactored critical backend microservices and **global e-commerce payment transaction flows**, improving API response times **35%** and reducing checkout cart abandonment **12%**.
- Standardized local environments with Docker and raised JUnit coverage to **85%**, cutting post-release regressions **18%**.
- Collaborated across distributed multicultural teams (US, India, LATAM), reducing merge-approval times **20%**.

Senior Java Specialist | *Citibank 2021 – 2022* **Stack:** Java, Oracle SQL, PL/SQL, Spring Beans, Jenkins, Gradle, WebSphere.

- **High-integrity data migration:** moved complex transactional structures from Sybase to Oracle — **15M+ financial records with 0% data loss** and **50%** faster queries.
- Automated monthly financial reporting, saving **120+ engineering hours monthly** and reducing processing errors **40%**.
- Operated under strict banking security and international financial compliance with squads in US, Ukraine, India and Chile.

Lead Developer & Tech Lead | *Seven IT SpA (Hospital Cruz del Norte, SQM) 2017 – 2020* **Stack:** Node.js, Spring Boot, PostgreSQL, Vue.js, Google Cloud, Docker, GitLab CI/CD.

- Architected and shipped a healthcare management platform from scratch, cutting clinical administrative processing time **60%** and patient queue times **40%**.
- Led and mentored 4 engineers; introduced GitLab CI/CD and Docker, reducing GCP spend **30%**.

Senior Software Engineer | *WebClass, Creasys, Coopeuch and others 2008 – 2017* **Stack:** Java, PHP, .NET, C, Python, AS/400, Struts, Hibernate, PostgreSQL, SQL Server, Oracle.

- Scaled an education platform to **1,800 schools** and **500k+ daily active requests** at **99.9% uptime**.
- Led legacy migrations (AS/400 → modern Java), saving clients **80+ manual hours weekly**.

Education

Computer Science and Informatics Engineering — Universidad del Bío Bío *Thesis: Extreme Programming (XP) — Theory and Practice.*
