

Gonzalo Oviedo Lambert

Elixir Developer | Phoenix & OTP · Backend APIs · Fintech Background Chile (UTC-4) — Fully Remote goviedo.laboral@gmail.com | +56 9 6372 3603 linkedin.com/in/gol | English B1 (Intermediate) — comfortable written and spoken

Professional Summary

Backend engineer with **15+ years** of experience, working daily in **Elixir, Phoenix and OTP**. I discovered functional programming through the Phoenix framework and it changed how I think about system design — today I have **two Elixir/Phoenix projects running in production**, including one whose entire frontend is built in **Phoenix LiveView**.

I build **backends and APIs** with an emphasis on fault tolerance: OTP GenServers, Supervisors and supervision trees, so failures stay isolated instead of cascading. Around that, solid **PostgreSQL** modeling and query optimization.

Fintech and regulated-domain background: at Citibank I migrated **15M+ financial records** from Sybase to Oracle with **0% data loss** and **50%** faster queries, working under strict banking security standards with distributed teams across four countries.

I use **agentic AI harnesses** (Claude Code, Pi.dev, opencode) daily as a productivity multiplier, applying architectural judgment and automated testing rather than blind delegation — **300%** delivery velocity at **99.98%** stability.

Technical Skills

- **Elixir & BEAM:** Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP (GenServers, Supervisors, supervision trees), ExUnit, concurrent and fault-tolerant design.
 - **Backend & APIs:** REST APIs, microservices, event-driven architecture, CQRS, WebSockets, OpenAPI/Swagger, Clean/Hexagonal Architecture, SOLID.
 - **Databases:** PostgreSQL, Oracle PL/SQL, MySQL, SQL Server, Sybase, MongoDB, Redis — modeling, query optimization and large-scale migrations.
 - **Cloud & DevOps:** Google Cloud (Cloud Run, Cloud SQL, Cloud Storage), AWS Lambda, Docker, Kubernetes, Pulumi (IaC), GitLab CI/CD, GitHub Actions, Jenkins.
 - **Other languages:** Java (8-21) / Spring Boot, TypeScript / JavaScript, Node.js, Python, SQL, Bash.
 - **Frontend when needed:** Phoenix LiveView, React, Vue.js/Nuxt, Flutter.
 - **Practice:** TDD, Extreme Programming (XP), pair programming, Scrum/Kanban, 80%+ test coverage, technical leadership and mentoring.
 - **Agentic AI:** Claude Code, Pi.dev, opencode, Playwright MCP, LLM integration.
 - **Exploration:** Blockchain (Solidity, Internet Computer/ICP), high-concurrency systems on the BEAM.
-

Professional Experience

Lead Software Engineer & Technical Architect | *Mobility Startup 2024 – Present* **Stack:** Elixir, Phoenix, Phoenix LiveView, Ash Framework, OTP, Google Cloud, Pulumi IaC, Docker, Claude Code, Pi.dev, opencode.

- **Two Elixir/Phoenix systems in production:** www.tellevoapp.cl (full Elixir/Phoenix site) and app.tellevoapp.cl, with its **entire frontend written in Phoenix LiveView**.
- Architected the platform on **Elixir/Ash Framework** over the BEAM, using **OTP** supervision trees and GenServers for fault tolerance.
- Designed and implemented **distributed systems** with a microservices, event-driven approach.
- Automated the whole cloud infrastructure with **Pulumi IaC** on GCP; serverless APIs cut hosting cost **45%** and latency **30%**.

- Introduced agentic AI harnesses as the team standard for productivity, backed by automated E2E, unit and integration testing.

Senior Java Specialist | *Citibank 2021 – 2022* **Stack:** Java, Oracle SQL, PL/SQL, Spring Beans, Jenkins, Gradle, WebSphere.

- **Fintech data migration:** moved complex transactional structures from Sybase to Oracle — **15M+ financial records with 0% data loss, 50% faster queries.**
- Automated monthly financial reporting, saving **120+ engineering hours per month** and reducing processing errors **40%.**
- Delivered under strict banking security and international financial compliance, collaborating with squads in US, Ukraine, India and Chile.

Senior Java & Full-Stack Developer | *Perficient — Caterpillar 2022 – 2023* **Stack:** Java 21 (Spring Boot), microservices, REST APIs, Docker, GitHub, GitLab, Agile.

- Refactored backend microservices and global e-commerce payment flows: **35% faster APIs, 12% less cart abandonment.**
- Raised JUnit coverage to **85%**, cutting post-release regressions **18%.**

Lead Developer & Tech Lead | *Seven IT SpA (Hospital Cruz del Norte, SQM) 2017 – 2020* **Stack:** Node.js, Spring Boot, PostgreSQL, Vue.js, Google Cloud, Docker, GitLab CI/CD.

- Architected a healthcare management platform from scratch, cutting clinical administrative processing time **60%.**
- Led and mentored a team of 4 engineers; introduced GitLab CI/CD and Docker, reducing GCP spend **30%.**

Senior Software Engineer | *WebClass, Creasys, Coopeuch and others 2008 – 2017* **Stack:** Java, PHP, .NET, C, Python, AS/400, Struts, Hibernate, PostgreSQL, SQL Server, Oracle.

- Scaled an education platform to **1,800 schools** and **500k+ daily requests** at **99.9% uptime.**
- Led legacy migrations (AS/400 → modern Java), saving clients **80+ manual hours weekly.**

Education

Computer Science and Informatics Engineering — Universidad del Bío Bío *Thesis: Extreme Programming (XP) — Theory and Practice.*
